COUNTRY/REGIONAL INSIGHT

ROMANIA

Risk Category

HIGH

MODERATE

LOW

High Risk

Low Risk

We have downgraded Romania's political/insecurity risk rating as the government faces a growing challenge from national-conservative parties; political instability could curtail EU funds.

RISK ASSESSMENT

Risk Indicator

Risk Level of the Company is : **LOW**

D&B Rating

Financial Strength	Risk Indicator
D	2
Based on tangible net worth	Good (Low Risk)

Former Rating

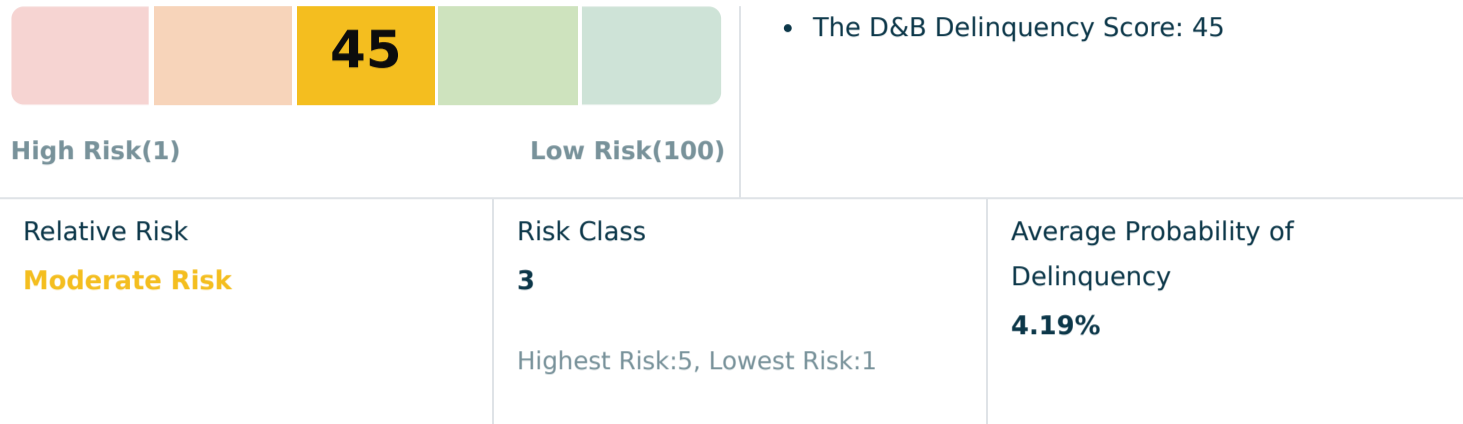

Financial Strength	Risk Indicator
N/A	N/A

The Dun & Bradstreet Rating of D2 indicates:

- Financial Strength of USD 120,000 to USD 175,000 (based on net worth).
- A Risk Indicator which is Good (Low Risk).

DELINQUENCY SCORE

Delinquency Score for this business.

Interpreting the Delinquency Score:

1. The D&B Delinquency Score predicts the likelihood that a business will pay its obligations late within the next 12 months.
2. The D&B Delinquency Score is a relative measure of risk, where 1 represents businesses that have the highest probability of severely delinquent payments and 100 the lowest.

TREND ANALYSIS

Key Trends

Risk Indicator	Statutory Debt	No. of Employees
<p>Static</p>	<p>Static</p>	<p>Improving</p>

Understanding Key trends:

Using historical archive data we are able to plot the movement of key data elements.

Methodology:

Where data availability allows we are monitoring six elements for key trends: solvency ratio, current ratio, statutory debts, employee figure, scores or rating. Financial trends are based year over year using latest available financial statements or figures, whereas statutory debt comparisons are made quarterly as fresh information is released. Comparative employee data, typically collected directly from the subject company is therefore triggered by latest to last date of update. As our scores are recalculated on the basis of all fresh information these comparisons will also reflect latest to last date of update position.

CUSTOMER SERVICE

Speed of service:	Typically 4 working days
SCN:	202503275007920545
Order Date:	Mar 27, 2025

Should you require any further information or have any questions, please contact your local Customer Service Centre.

Enquiries should **always** contain the below minimum details please:

- Full Company Name
- Full Headquarters Address (street, town, country)
- Telephone Number
- Business Identification Number (registration number, chamber of commerce number, VAT number, Government Gazette number)
- Contact Name
- SCN
- Order Date

The information in this report was last updated on **Mar 24, 2025**.

D&B RATING GLOSSARY

D&B Rating - The D&B Rating consists of two parts, the Financial Strength Indicator and the Risk Indicator.

For example: in the case of a **2A 4** rating, **2A** means the financial strength of the business and **4** is the risk indicator.

The **Risk Indicator** is used in conjunction with the Financial Strength Indicator. The Risk Indicator reflects D&B's opinion of the risk associated with trading with a specific business, notably the likelihood of business continuance or failure over the next 12 months. Created from expert rules systems, the Risk Indicator is refreshed whenever data is loaded onto our databases. Please see the table below for the Risk Indicators and their corresponding values.

Risk Indicators

4	Significant level of risk	Take suitable assurances before extending credit
3	Greater than average risk	Proceed with transaction but monitor closely
2	Low risk	Proceed with transaction
1	Minimal risk	Proceed with transaction - offer terms required
-	Insufficient information to assign a risk indicator	No public information or D&B proprietary information available to indicate trading activity

The **Financial Strength Indicator** is based on either Net Worth or Issued Capital. The table below contains the possible values.

Financial Strength Indicator		Range	
Net Worth	Capital	FROM	TO
5A	5AA	\$60 million	And above
4A	4AA	\$25 million	\$60 million
3A	3AA	\$12 million	\$25 million
2A	2AA	\$2.5 million	\$12 million
1A	1AA	\$1.2 million	\$2.5 million
A	AA	\$600,000	\$1.2 million
B	BB	\$345,000	\$600,000
C	CC	\$175,000	\$345,000
D	DD	\$120,000	\$175,000
E	EE	\$60,000	\$120,000
F	FF	\$35,000	\$60,000
G	GG	\$15,000	\$35,000
H	HH	0	\$15,000

Alternate Ratings Used

N	Financial Strength is negative
O	Financial Strength is undisclosed
NB	New Business: Less than 24 months
NQ	Out of Business: Business has ceased to trade

FINANCIAL RATIO GLOSSARY

Key Business Ratios are used to identify irregularities in the status and future potential of a company.

Name	Formula	Explanation
Current Ratio (x)	Total Current Assets / Total Current Liabilities	This ratio shows the cover by current assets of short term creditors, and the higher the ratio the more assurance there is that payment of creditors can be met.

Solvency Ratio %	$((\text{Current Liabilities} + \text{Long Term Liabilities}) / \text{Tangible Net Worth}) \times 100$	<p>From this can be seen the extent to which the company is financed by creditors and debt rather than permanent finance.</p> <p>The higher the ratio the more likely it is that debt (either short term or long term) will be a burden to the company. The effect is higher interest charges, lower profits and a squeeze on liquidity to the disadvantage of creditors.</p>
Fixed Assets to Net Worth (%)	$(\text{Total Fixed Assets} / \text{Tangible Net Worth}) \times 100$	<p>The proportion of net worth that consists of fixed assets will vary greatly from industry to industry, but in general terms a company is under capitalised if fixed assets exceed net worth. In this case it is possible that the company has too much debt, and it should therefore be examined with care.</p> <p>If on the other hand fixed assets are much lower than net worth the company is over capitalised and is either extremely cautious or in a position to expand. thus a ratio either well in excess of the median, or well below it, means that the company should be looked at with care.</p>
Current Liabilities to Net Worth (%)	$(\text{Total Current Liabilities} / \text{Tangible Net Worth}) \times 100$	<p>This contrasts the funds that creditors are temporarily risking with a company with the funds permanently invested by the owners.</p> <p>The higher the ratio the less security for creditors. Care should be exercised when selling to any company with creditors of less than one year exceeding two thirds of net worth.</p>
Asset Turnover (%)	$(\text{Turnover} / \text{Total Assets (including Intangibles)}) \times 100$	<p>This ratio measures how efficient the company's management has been in generating sales from the assets at its disposal.</p> <p>The measure can vary considerably from industry to industry and should therefore be judged according to the industry norm.</p>
Sales to net working capital (x)	$\text{Turnover} / \text{Net working capital} *$	<p>This ratio indicates whether a company is overtrading (handling an excessive volume of sales in relation to working capital). Companies with substantial sales gains often reach a level where their working capital becomes strained.</p> <p>Even if they maintain an adequate total investment for the volume being generated (assets to sales) that investment may be so centred in fixed assets or other non-current items that it will be difficult to continue meeting all current obligations. A ratio falling into either an extremely high or low position may indicate potential problems.</p>

Assets to Sales (%)	$(\text{Total Assets (including Intangibles)} / \text{Turnover}) \times 100$	<p>This correlates sales with the total investment that is used to generate those sales. By comparing a company's ratio with industry norms it can be determined whether the business is overtrading or conversely, carrying more assets than needed for its sales volume.</p> <p>Abnormally low ratios can indicate overtrading which may lead to financial difficulties if not corrected. Extremely high ratios can be the result of a too conservative management or too low a level of turnover.</p>
Profit Margin (%)	$(\text{Profit before Tax} / \text{Turnover}) \times 100$	<p>This reveals the profits earned per pound of sales and therefore measures the efficiency of the operation.</p> <p>This ratio is an indicator of the business'ability to withstand adverse conditions such as falling prices, rising costs or declining sales</p>
Shareholders' Return (%)	$(\text{Profit before Tax} / \text{Tangible Net Worth*}) \times 100$	<p>This ratio is used to analyse the ability of the company's management to realise an adequate return on the capital invested by the owners of the business. There is a tendency to look increasingly to this ratio as a final measure of profitability.</p> <p>Generally, a relationship of at least 10% is regarded as desirable for providing dividends plus funds for future growth.</p>
Return on assets (%)	$(\text{Profit before Tax} / \text{Total Assets}) \times 100$	<p>This is the key indicator of profitability for a company it matches operational profits with the assets available to earn a return.</p> <p>Companies using their assets efficiently will have a relative high return while less well run businesses will have a relatively low return</p>
Sales per Employee (000)	Turnover / Employees	This gives an indication of the efficiency of the labour force. This ratio will vary considerable from industry to industry
Profit per Employee (000)	Profit before Tax / Employees	This ratio gives a guide as to how effectively the labour force is utilised, and is the best way to measure productivity of labour investment

GLOSSARY OF LOCAL ACTIVITY CODE

Country	Local Activity Code Type
Bosnia	KDBIH 2010
Bulgaria	NACE Rev 2
Croatia	NKD 2007
Estonia	EMTAK
Greece	NACE Rev 2
Iceland	ISAT 2008
Romania	NACE Rev 2
Serbia	KD 2010

GLOSSARY OF LEGAL FORMS

Legal Form	Legal Form (local)
Proprietorship	Persoana fizica / Asociatii familiale
